Sydney

1 year of experience building responsive web applications using React and related technologies. Proficient in developing reusable components, integrating APIs, optimizing performance, and working collaboratively. Familiar with web development best practices, version control, and agile methodologies.

Experience

Darumatic

Apr 2021 - Mar 2022

React Developer

The Investor Portal allows Investors to purchase shares in investment projects as well as to manage their investment holdings. I worked as a front-end developer for the Investor Portal. The front-end is written in React.js. My main duties included developing functionality as well as being responsible for the responsive design. The front-end is deployed using AWS S3 for the front-end and AWS ECS for the backend.

Jan 2021 - Apr 2021

React Developer - Internship

I had a 3 months Internship on an internal project before I got a job contract.
